

Haitam Haouari

Software Engineer · Web Developer

haouarihk@gmail.com · github.com/haouarihk · haouarihk.com

Summary

Full-stack software engineer with a focus on JavaScript, TypeScript, React and Next.js, plus Rust for backend work. I build web apps, developer tools and open-source projects, ship fast, and enjoy solving real-world problems in remote-first teams.

Experience

Zoubda

Feb 2026 – Jun 2026

Software Engineer

Worked on zoubda.com, a multilingual book-summary platform serving thousands of readable and audio summaries in Arabic, English and French.

Private Agency

Oct 2025 – Dec 2025

Internal Scraping Tool

Built an internal tool that scrapes and organizes client information for an agency. Private work, not open source.

Obsidian Text Generator

2022 – now

Plugin Contributor

Heavily contributed to a 2k-star open-source AI plugin for Obsidian. Cross-provider text generation (OpenAI, Anthropic, Google, local models), community templates, CI and usability improvements. TypeScript.

Accommodation.co.uk

2021 – 2022

Software Engineer (Freelance)

API security hardening, Nuxt 2 to 3 migration, and UI improvements.

Inventory App · POS System

2019 – 2020

POS System Developer

Full-featured, offline-first POS application for a local shop built with Svelte, Firebase and Electron.

word2latex.net · Academic Docs

2019 – 2020

LaTeX Specialist

Converting Word documents to LaTeX for university students and researchers, delivering clean publication-ready formatting.

DocToLaTeX File Conversion API

2019

Backend Developer

Document conversion server built with Node.js and Laravel supporting uploads and automated conversion.

Selected Projects

- **Diggit** — federated decentralized Git provider. Rust API with git smart-HTTP, SSH, OAuth, and ActivityPub-style federation. github.com/haouarihk/diggit
- **Web Tools** — tools for developers and Discord users: JSON formatter, JWT decoder, cron builder, Discord timestamps, and more. tools.haouarihk.com
- **mcpsshub** — open-source MCP server running commands on remote machines over a plain WebSocket, no SSH. github.com/haouarihk/mcpsshub
- **Moderation API** — self-hostable, OpenAI-compatible content moderation API. BERT-based, 11 harm categories, CPU and GPU images. github.com/haouarihk/moderationAPI
- **goImgTemplator** — Go image-generation engine for dynamic badges and rank cards from PNG templates. github.com/haouarihk/goImgTemplator
- **Geoguessr → CS ranks extension** — Chrome/Firefox extension swapping Geoguessr ranks for Counter-Strike ranks.
- **CS2 Linux tweak script** — low-latency Linux tuning for Counter-Strike 2. github.com/haouarihk/cs2-linux-tweak

Skills

Proficient: JavaScript, TypeScript, React, Next.js, Node.js, TailwindCSS

Familiar: Rust, Go, Svelte, Python, GraphQL, Firebase, Web3.js, Electron, Laravel, FastAPI

Languages & Interests

English (Fluent, professional), Arabic (Native), French (Basic).

Coding, solving technical challenges, learning new technologies, and occasional gaming.
